

OMID RAHIMI

Wireless/RF Systems Engineer | 4G/5G RAN | System Integration & Validation

Deggendorf, Germany | +49 176 48994467 | omid.rahimirad@gmail.com

LinkedIn: [Omidrahimi](#) | Portfolio: [omidrahimi.netlify.app](#)

Wireless/RF Systems Engineer with 9+ years of experience in 4G/5G RAN operations, system integration, configuration validation, and KPI-driven troubleshooting. Experienced in large-scale telecom maintenance and modernization projects, including technical change-request validation, customer-facing coordination, and collaboration with R&D teams to maintain network stability, service quality, and operational reliability. Based in Germany, available for full-time employment at short notice, and open to relocation within Germany.

Core Competencies

- **RF & Wireless Systems**
LTE, 5G NR, RAN architecture, RF performance analysis, VNA-based RF/microwave measurements, RRC, NAS, MAC, PHY, KPI-driven troubleshooting
- **System Integration, Test & Validation**
End-to-end integration, configuration validation, requirements-based verification, post-change validation, performance and load testing, root-cause analysis, test documentation
- **Test Automation & Engineering Tools**
Python, pandas, NumPy, SQL, Jupyter, Linux, Git, reproducible test workflows, automated KPI and data analysis
- **Data, AI & Embedded Technologies**
scikit-learn, Power BI, Retrieval-Augmented Generation (RAG), C/C++ basics, Arduino, LoRa, BLE
- **Languages**
English C2 | German B2+ | Persian native

Professional Experience

Wireless (RAN) Engineer – RAN Operations & Optimization

Contracted via FPR Co. / Delta Ertebatat Iranian for Huawei RAN projects, Tehran, Iran

July 2016 – March 2023

- Contributed to country-wide Huawei RAN maintenance and modernization projects covering 13,000+ mobile network elements, supporting stable 2G/3G/4G and early 5G services.
- Performed KPI- and protocol-based root-cause analysis across RRC, NAS, MAC and PHY using RSRP, SINR, BLER, throughput, latency and handover KPIs.
- Acted as the technical interface between customer teams, internal engineering teams and Huawei R&D for complex network issues and new features.
- Executed 50+ live software upgrades and validated 400+ configuration changes, reducing deployment risk and protecting service continuity.

Wireless Network Modernization Engineer – ZTE Parsian Modernization Project

Employed by Iran Ofogh Industrial Development Co.; assigned to ZTE Parsian, Tehran, Iran

May 2015 – July 2016

- Integrated 900+ BTSs and network nodes during a large-scale modernization rollout, ensuring compatibility and stable post-rollout operation.
- Coordinated site integration, radio configuration and parameter updates with field and planning teams during network expansion and 4G migration.
- Validated post-change performance using alarms and KPIs, resolving configuration and integration issues.

RAN Front Office Engineer – Huawei Technologies Service Project

Employed by SGS Iran for Huawei RAN projects, Tehran, Iran

March 2013 – March 2015

- Held shift-based operational responsibility for monitoring RAN health, availability, alarms and traffic in a live mobile network.
- Analyzed accessibility, retainability, mobility and capacity KPIs and performed first-level troubleshooting.
- Managed incident documentation, escalation and handover to specialist teams in line with operational procedures and SLAs.

Education & Professional Development

Career Coaching – High Profiling

INQUA Institute, Berlin, Germany | Since April 2026

Master of Science – Electrical Engineering and Information Technology (Automation)

Deggendorf Institute of Technology (THD), Germany | March 2023 – March 2026

Master's Thesis: Permittivity Characterization for RF and Microwave Applications: Experimental Measurement and AI-Based Prediction

Academic research focused on RF measurement analysis, AI-based material characterization, and system-level evaluation of 5G test environments. Developed and analyzed Kubernetes-based 5G test scenarios, including multi-user performance, throughput, and latency evaluation.

Bachelor of Science – Electrical Engineering (Electronics)

Ferdowsi University of Mashhad, Iran | September 2008 – September 2012

Bachelor's Thesis: Analysis of CDMA Codes: Maximal-Length, Gold, and Kasami Sequences

CERTIFICATIONS & TRAINING

- Huawei Certified 5G Associate
- Huawei Certified Network Professional (HCNP – LTE)
- Machine Learning with Python and scikit-learn
- Microsoft Power BI and SQL

AWARDS & HONORS

- Technical Star Award, Huawei, 2022
- Outstanding Engineer & Network Safety Team Award, Huawei, 2021
- Individual Engineer Star & Bright Star Award, Huawei, 2020
- Top 1% in Iran's National University Entrance Examination, 2007

INTERESTS

- Photography | Swimming | Fitness

Additional Information

- Driver's License: Class B | Willing to travel | Authorized for full-time employment in Germany
